(black/white)

Optical signalling of
calls with LEDs

[Watch product video](#)

135 x 135 x 17 mm
All dimensions: width x height x depth

skS Video indoor station I VICO

When receiving a call, the camera image is automatically displayed. By touching the display the call menu is opened which leads you into the main menu.

Optional image storage function (only in connection with a media coupler, no. 300102). An image of the visitor is stored for every incoming door call, which allows for viewing missed callers (whilst out).

All other functions and settings are done in the clearly structured and intuitive main menu.

Muting is done intuitively via the main menu. The duration of the muting can be chosen by the resident. After the chosen time span the ringtone is automatically switched back on.

179 x 179 x 4 mm in-wall dimensions
All dimensions: width x height x depth

sks Door station I COMFORT 5,7“

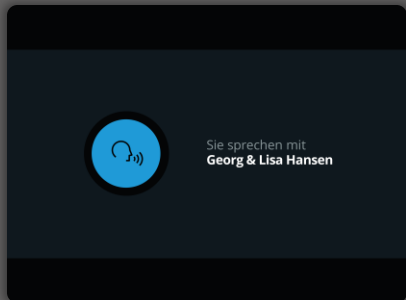

Welcome screen

When a person approaches the door station, the color display switches on automatically.

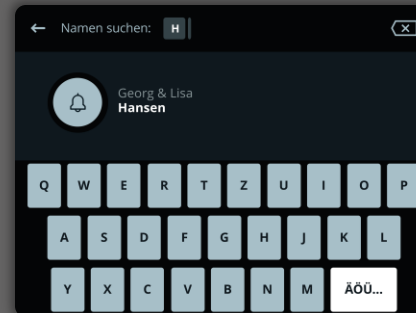

Finding names

Names can be found by swiping or scrolling. By simply touching the name the call is initiated. The visitor gets optical feedback and status information directly on screen.

Functions displayed – barrier-reduced acc. to DIN 18040

In addition to the acoustic signals the status is also displayed symbolically and in text on-screen for the hearing-impaired.

Comfortable search function

For larger residential estates, office buildings or student housing, names can easily be found via the search function with the virtual keyboard.

sks Door station I COMFORT 5,7“

Virtual code lock – Maximum security

Using the virtual code lock function, the COMFORT door station may also function as a door opener. Through randomly displayed numbers on the number pad, maximum security against being spied on is given. Whenever used the numbers (digits 0...9) are displayed in a different order.

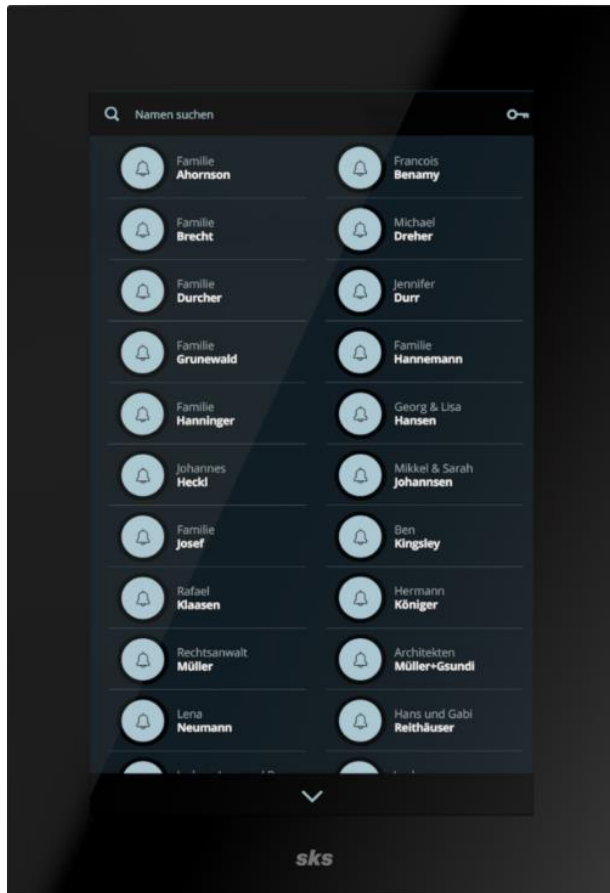

sks Door station | COMFORT 10.1“

COMFORT door station
with screwless stainless
steel front panel

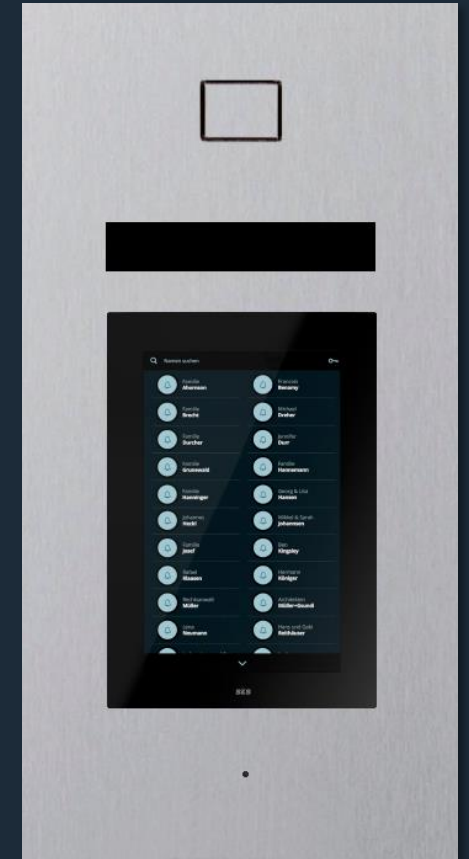

sks Door station | COMFORT 10.1“.

Multi-functionality at its best – audio/video door station, access control and information system all in one.

Screwless installation – for a clean and elegant design

An example of installation – individual designs are always possible.

Product portfolio

Individual custom-made door stations, letterbox systems and steles

Custom-made products made to measure

We offer a wide portfolio of products and look forward to being your professional and preferred partner in delivering custom-made products for your projects.

We manufacture building communication solutions made to measure with the highest standards of quality, precision and innovation.

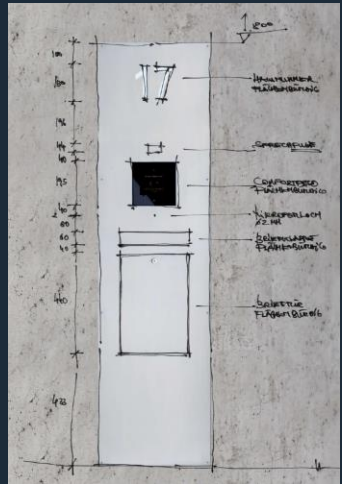

skS Free choice of color according to the RAL system

Unique door stations as a perfect addition to your entrance design

There are hardly any limitations to the color design of our door stations: Thus the door station can adapt the color concept of the surrounding architecture or set its own colorful imprint – simply in line with your preferences.

IP-Gateway – extension of an existing 6-wire system

skS IP-Gateway | Extension of an existing 6-wire system

"I'll open the door,
come on up"

IP Gateway II

Secure access control
by SKS Kinkel

skS IP | IP-Gateway II

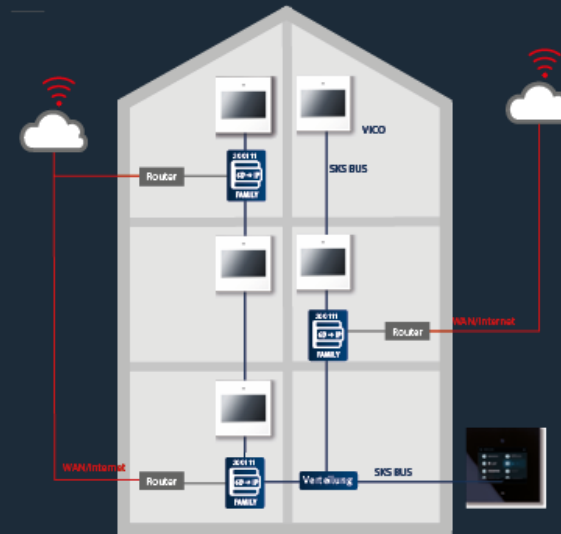

In case you already have a SKS 6-wire BUS system with a COMFORT door station you may easily upgrade it with an IP Gateway II.

The IP Gateway II connects your SKS 6-wire BUS system with IP-based communication.

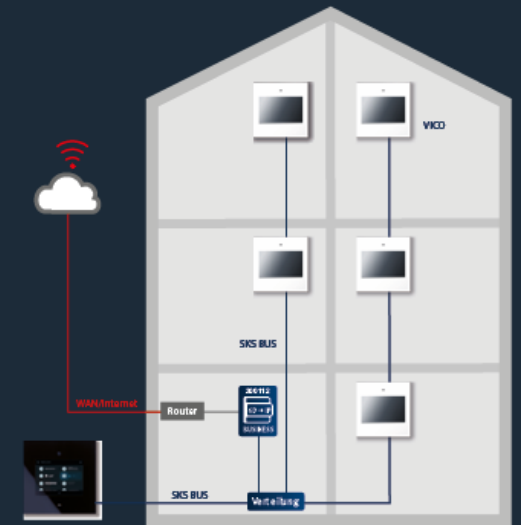

By connecting mobile devices you will benefit from the worldwide accessibility of your intercom system.

Offers worldwide communication

The IP Gateway II family can be used as a decentralized solution for individual or detached houses.

The IP Gateway II **business** is suitable for installation in business areas for various residential units.

IP technology

sks IP | Almost unlimited possibilities with the my sks products

Get to know the advantages
of the SKS IP world!

Video 1 –
SKS IP product world

Video 2 –
SKS IP application spectrum

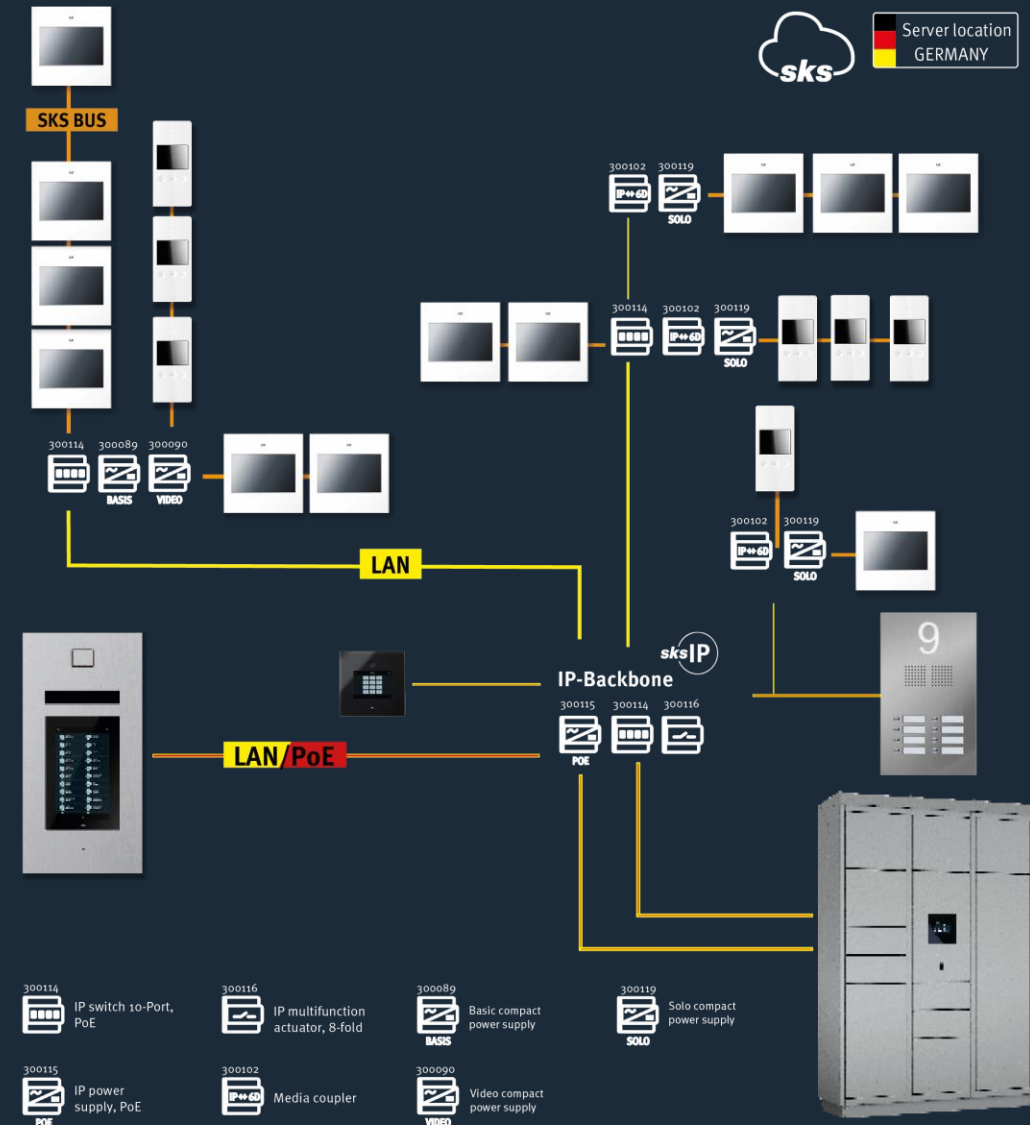

skS IP | portfolio

Integrate proven SKS technology into modern SKS IP technology and experience almost unlimited possibilities.

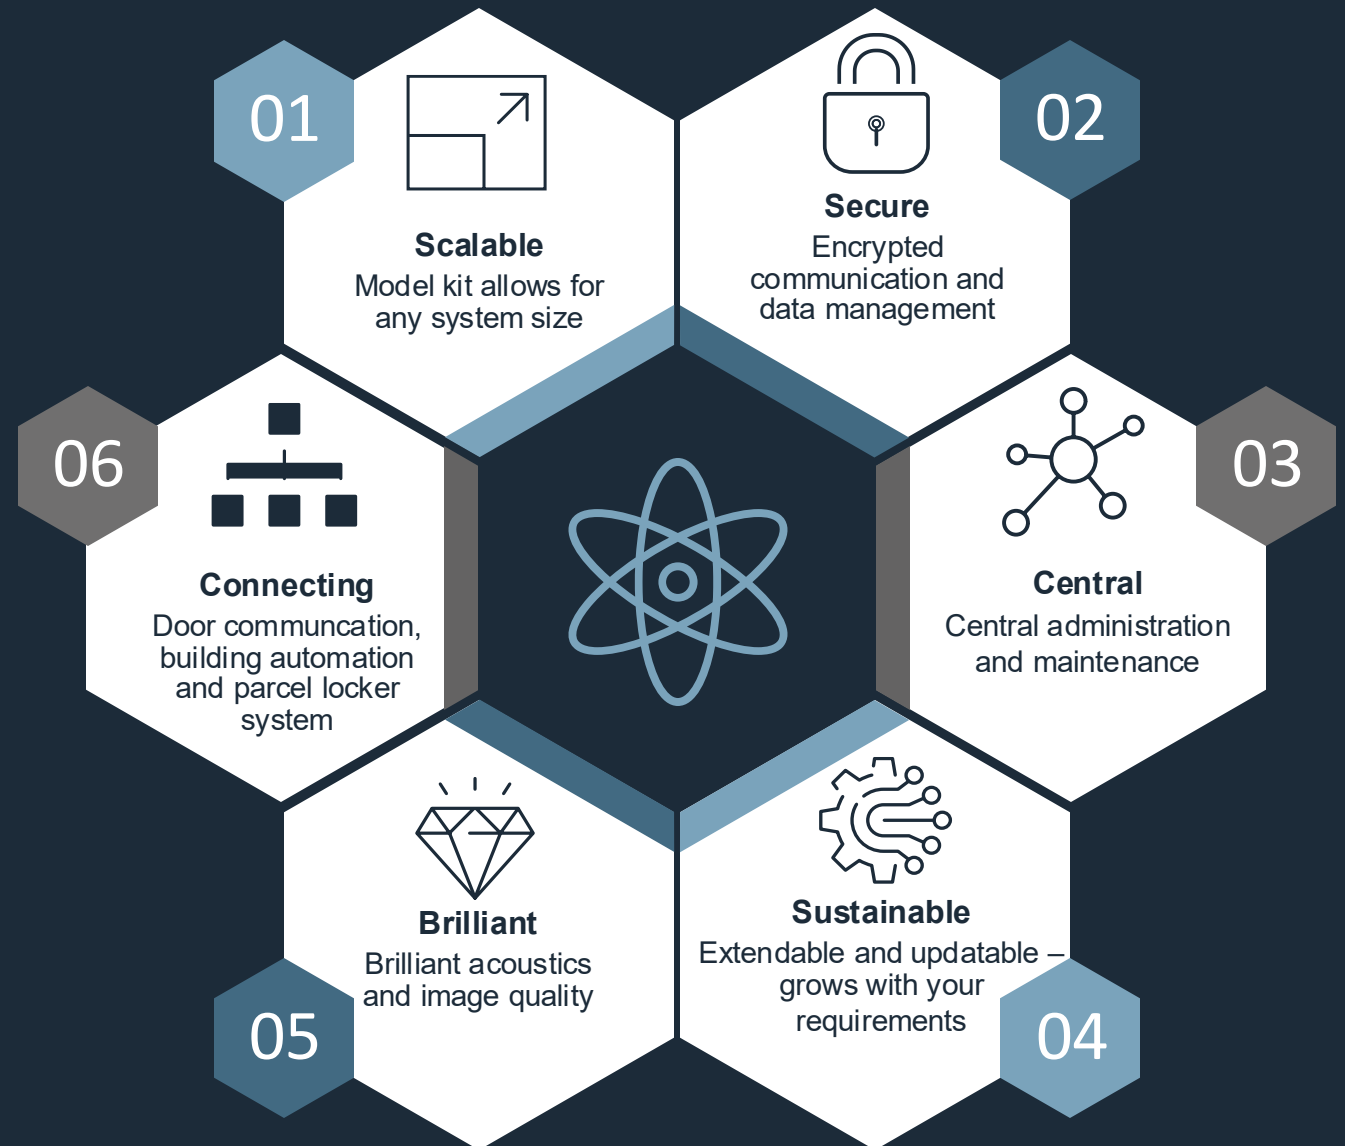

The SKS IP product portfolio allows for an almost unlimited number of IP door stations and indoor stations to be installed in a building complex.

Apart from that both initial setup and maintenance can easily and be done via the my sks portal.

Advantages using an SKS IP system

IP power supply PoE

Using the IP power supply PoE in combination with the IP Switch 10-port PoE it is possible to operate COMFORT IP door stations as well as other PoE(+)-capable devices.

IP Switch 10-Port PoE

Using the IP Switch 10-Port PoE it is possible to network up to 10 devices. An external power supply such as the SKS IP power supply PoE is necessary to operate the COMFORT IP door station.

IP multi function actuator, 8-fold

The SKS IP multifunctional actuator 8-fold with its 18 inputs (16 digital, 2 analogue) It controls for example door openers, door operators, staircase lights and also monitors temperatures, locking states or light switches.

sks IP-Portfolio | Application examples

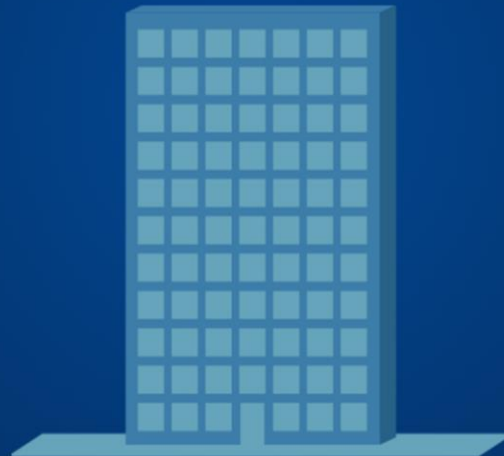

SKS IP technology...

SKS IP technology offers numerous functions beyond pure building communication.

... for example in smart homes.

... in a residential park

... in a big residential building

... in an industrial site

Your competent partner for innovative, modern and digital building communication and parcel locker systems.
